Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/068,004

Applicant(s)

SO ET AL

Examiner

A. Sefer

Art Unit

2826

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 April 2006.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 12,14-16,22 and 24-27 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) ☒ Claim(s) 22,24,25 and 27 is/are allowed.
6) ☒ Claim(s) 12 and 14 is/are rejected.
7) ☒ Claim(s) 15,16,26 and 28 is/are objected to.
8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
10) ☒ The drawing(s) filed on 29 September 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____.

DETAILED ACTION

Response to Amendment

1. The amendment filed April 14, 2006 has been entered and new claim 28 has been added.
2. Submission of the translation of the foreign language application (KR 2001-10842) is acknowledged. However, the declaration is not acceptable since it is not in accordance with **37 CFR 1.68**.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang et al. ("Chang") US PG-Pub 2002/0153527 in view of Yamazaki et al. ("Yamazaki") USPN 5,568,288.

Chang discloses in figs. 1A-1F a thin film transistor (TFT), comprising: a substrate; a semiconductor layer 102 formed over said substrate having end portions; a first insulating layer 104 disposed on said semiconductor layer so as to expose ones of the end portions of said semiconductor layer; a gate electrode 108 formed over said first insulating layer; a capping layer (upper portion of region 114) formed over said gate electrode; spacers (portions of region 114 on both sidewall portions of gate electrode 76) formed over said first insulating layer and on both sidewall portions of said gate electrode and said capping layer; high-density source and drain regions 116 formed at the ones of the end portions of said semiconductor layer exposed beyond

Art Unit: 2826

said spacers, the high-density source and drain regions spaced apart from the gate electrode and the capping layer; low-density source and drain regions 110 having a same conductivity as high-density source and drain regions formed at regions of said semiconductor layer under said spacers between the gate electrode and the high density source and drain regions, thereby providing said semiconductor layer with lightly doped drain (LDD) regions under said spacers, but lacks anticipation of source and drain electrodes contacting high density source and drain regions without contact holes.

Yamazaki discloses in figs. 21 and 22 a thin film transistor (TFT), comprising: a substrate; a semiconductor layer formed over said substrate having end portions; a gate electrode 107 formed over an insulating layer 103; and source and drain electrodes 102 which respectively contact high density source and drain regions 104/105 without contact holes.

Therefore, in view of Yamazaki, one having ordinary skill in the art at the time the invention was made would be motivated to modify Chang's device by incorporating the teachings of Yamazaki so as to complete the thin film transistor as taught by Yamazaki.

Regarding claim 14, Chang discloses (Pars. 0029 and 0032) said first insulating layer, said capping layer and said spacer are of an oxide.

Allowable Subject Matter

4. Claims 22, 24, 25 and 27 are allowed.
5. Claims 15, 16, 26 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 12, 14-16, 22 and 24-28 have been considered. While the arguments with respect to 22, 24, 25 and 27 and 15, 16, 26 and 28 are moot, the rejection of claims 12 and 14 are maintained since the declaration is not in accordance with **37 CFR 1.68** which states that any document to be filed in the Patent and Trademark Office and which is required by any law, rule, or other regulation to be under oath may be subscribed to by a written declaration. Such declaration may be used in lieu of the oath otherwise required, if, and only if, **the declarant is on the same document, warned that willful false statements and the like are punishable by fine or imprisonment, or both (18 U.S.C. 1001) and may jeopardize the validity of the application or any patent issuing thereon. The declarant must set forth in the body of the declaration that all statements made of the declarant's own knowledge are true and that all statements made on information and belief are believed to be true.**

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2826

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

NATHAN J. FLYNN
SUPERVISORY PATENT EXAMINER
TECHNOLOGY CENTER 2800

Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Sefer whose telephone number is (571) 272-1921.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn can be reached on (571) 272-1915.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
